Nothing got answered, none of my suggestions. No developer even bothered to tell me that they suck.

So much time and money was ruined just because someone decided that one particular colour of dye is a bad one.

You had both myself and Ostentatio respond and point out the basis of your argument is built around the exploited dye.

This matter is over Platyna, you have gotten your answer, even if you dislike it.

I posted at least several useful and nice suggestions and none of it was responded. Especially you never responded to the fact why I can't get a perfect dye of any colour in game but not black.

You people just decided a certain colour is a bad colour and ruined my ship collection just because. I put a lot of heart, time and money into it and it was blown up, just because I can't put a dye from two small barrels to a big barrel.

I wonder how players are now supposed to trust the development team. I blew 3g into it, 140 euro a month, and I can't (suddenly) even have a corbita in a colour I like.

What the hell guys?

I see no point of playing Wurm any more, you spent countless hours (find me a player who spent more time in game during the last half a year) and it all suddenly gets ruined and you learn you are a bug exploiter.

Seriously guys, what the hell?

Your argument is that you are using exploited dye and you have a less than perfect result.

your anger should be directed at the person who sold you the exploited dye, not us.

2/2/2 is absolutely indistinguishable from 1/1/1 and you cannot claim otherwise.

I'm aware ASD makes it difficult to accept change like this, but in this instance you need to understand the facts behind the change and that this was an exploit.

I can have a perfect dye of ANY COLOUR but black. And I put 3g and 5 months of my work into a ship collection. I see no reason to blame a person who sold me the dye, they advertised on a public, moderated, official trade channel. He has hidden nothing from you.

Anyway, I will order 20 lava tiles, burn my possessions to the ground and quit. Enough is enough. I am here only because I have my subscription paid up to May 2021 it was a stupid thing to do, and feel bad, as I would never buy so much premium if I knew such things like the above can happen.

You have shown me clearly that a devout fan, who does a lot of work for the community and who pays 140 euro a month is worth less than dust.

you can also have a perfect dye of black.

99ql black mixed with 99ql black will create 1/1/1 99ql black.

you cannot use the old exploited stock to have that however

I don't have QL99 black, I can't even buy it. I have what I have that I spent a lot of money for because RGB 1 1 1 dye wasn't cheap even before "the fix". There is 1 L of RGB 1 1 1 black that exist in the game after the "fix". 1 litre! In 18 years old game with hundreds of extreme players!

As I wrote on the thread - you like perfect RGB of any colour - you can get as much as you want, unless it is black - then you are a bloody bug exploiter, go sit in the corner.

Seriously, what the hell.

Not to mention because of what development team did a lot of big powerful players blame me for their 80% stock loss and therefore hate me.
