I've put in well over 10,000 hours prior to the steam release and I cannot in good conscience recommend this game.

This game is plagued with staff abuse, bugs and glitches that never get fixed, and censorship. On top of that, a lot of what you see here is false advertising in the vein of half truths.

Traslogan wrote up an excellent review better than I ever could, or this releases mention in the pcgamer subreddit should be far more explanation than necessary.
